## Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

## Listing of Claims:

1. (Currently amended) An organic electroluminescent element comprising a pair of electrodes having therebetween at least one constituting layer containing a phosphorescent light emitting layer, wherein one of the constituting layers contains a compound represented by Formula (15):

Formula (15)

$$\begin{pmatrix} \dot{z}_1 & \dot{z}_2 \\ \dot{z}_1 & \dot{z}_2 \end{pmatrix}_n$$

$$\begin{pmatrix} R_1 \end{pmatrix}_k \begin{pmatrix} \dot{z}_1 & \dot{z}_2 \\ \dot{z}_3 & \dot{z}_4 \end{pmatrix}_m$$

wherein  $R_1$  and  $R_2$  each independently represents a hydrogen atom or [[said]]  $\underline{a}$  substituent; n and m each represents an integer of 1 to 2; k and 1 each represents an

2

integer of 3 to 4, provided that n + k = 5 and 1 + m = 5; and  $Z_1$ ,  $Z_2$ ,  $Z_3$  and  $Z_4$  each represent a 6-membered aromatic heterocyclic ring containing a nitrogen atom; and wherein said substituent is selected from the group consisting of an alkyl group, a cycloalkyl group, an alkenyl group, an alkynyl group, an aryl group, an aromatic heterocyclic group, a heterocyclic group, an alkoxy group, a cycloalkylthio group, aryloxy group, alkylthio group, cycloalkylthio group, an aryloxycarbonyl group, an aryloxycarbonyl group, an aryloxycarbonyl group, a sulfamoyl group, an acyl group, an acyloxy group, an amido group, a carbamoyl group, an ureido group, a sulfinyl group, an alkylsulfonyl group, an aryl sulfonyl group, an amino group, a halogen atom, a fluoride hydro fluoro carbon group, a cyano group, a nitro group, a hydroxyl group, a mercapto group and a silyl group-

## 2-4. (Cancelled)

5. (Previously presented) The organic electroluminescent element of claim 1, wherein the compound represented by Formula (1) has a molecular weight of 450 or more.

## 6-31. (Cancelled)

- 32. (Previously presented) The organic electroluminescent element of claim 1, wherein the light emitting layer contains the compound represented by Formula 15.
- 33. (Previously presented) The organic electroluminescent element of claim 1, wherein at least one of the constituting layers is a hole blocking layer and the hole blocking layer contains the compound represented by Formula 15.
- 34. (Previously presented) The organic electroluminescent element of claim 1 which emits blue light.
- **35.** (**Previously presented**) The organic electroluminescent element of claim 1 which emits white light.
- 36. (Previously presented) A display device having the organic electroluminescent element of claim 1.

Claims 37-63 (Canceled).

37. (Previously presented) The organic electroluminescent element of claim 1, wherein the constituting layer containing the compound represented by Formula (15) is an electron transporting layer.
